

Script Video Two: Initial training

Alice and Yousuf join enthusiastic and determined team of people eager to help the fight with the Pandemic and its consequences. And as in many citizens scientist projects they get through a training first.

Theodor - the project coordinator wants to make certain that all volunteers understand several key issues.

Firstly, that their efforts are highly appreciated. However, being a volunteer doesn't mean that Alice and Yousuf have no obligations towards the project.

A volunteer is bound to keep the good name and reputation of the project they volunteer to, the other volunteers and collaborators, as well as any commercial corporation the

Further, volunteers are required to keep the information they are entrusted with private, unless explicitly instructed otherwise.

Thirdly, the volunteers should follow the general rules and legal obligations an employee with the project would have.

But the details of those general rules will be the subject of this module.
